

La tension d'alim de la plateforme peut être ajustée de 1,24V à 5,1V (0,5A max)

Platform Power Supply

Risque de court-circuit à vérifier

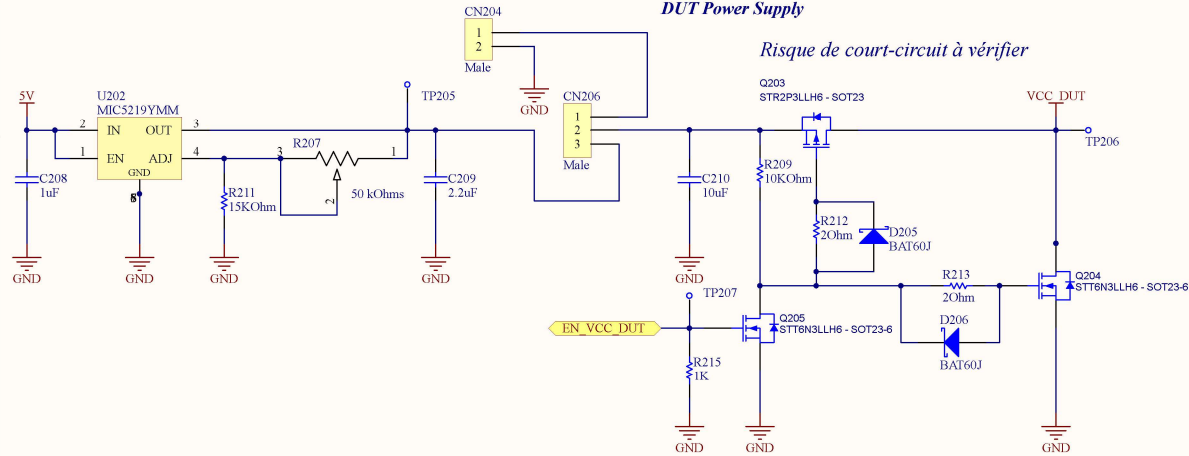

5V Source (5.5V max)

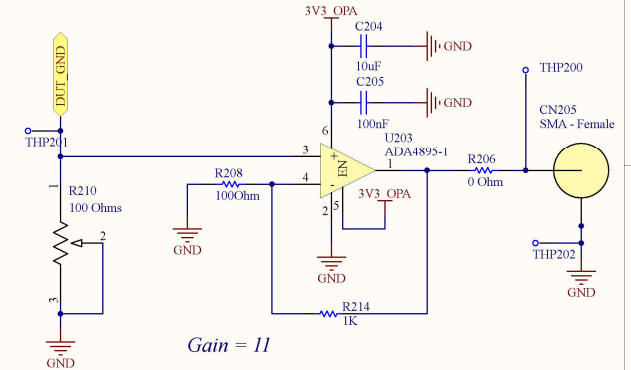

La tension d'alim du DUT peut être ajustée de 1,24V à 5,1V (0,5A max)

DUT Power Supply

Risque de court-circuit à vérifier

Current measurement

Gain = 11

FPGA Power Supply

La tension des IOs peut être ajustée de 1,24V à 3,33V

LED Driver Power Supply
